## ESRA3 Country Fact Sheet

Version 2 (01/2024)

ESRA (E-Survey of Road Users' Attitudes) is a joint initiative of road safety institutes, research centres, public services, and private sponsors from all over the world. The aim is to collect and analyse comparable data on road safety performance and road safety culture. The ESRA data are used as a basis for a large set of road safety indicators. These provide scientific evidence for policy making at national and international levels. Vias institute in Brussels (Belgium) initiated and coordinates ESRA, in cooperation with ten steering group partners (BAST, DTU, IATSS, ITS, KfV, NTUA, PRP, SWOV, TIRF, University Gustave Eiffel). At the heart of ESRA is a jointly developed questionnaire survey, which is translated into national language versions<sup>1</sup>. The themes covered include: self-declared behaviour, attitudes and opinions on unsafe traffic behaviour, enforcement experiences and support for policy measures. The survey addresses different road safety topics (e.g. driving under the influence of alcohol, drugs and medicines, speeding, distraction) and targets car occupants, motorcyclists and moped riders, cyclists, riders of e-scooters and pedestrians.

This fact sheet contains the key results of the ESRA3 survey, which was conducted simultaneously in 39 countries in 2023. In total this online panel survey collected data from more than 37,000 road users (874 in Denmark, aged 18-74). The ESRA3 survey in Denmark was supported by Technical University of Denmark, Division of Transport. An overview of the initiative and more results are available on [www.esranet.eu](http://www.esranet.eu).

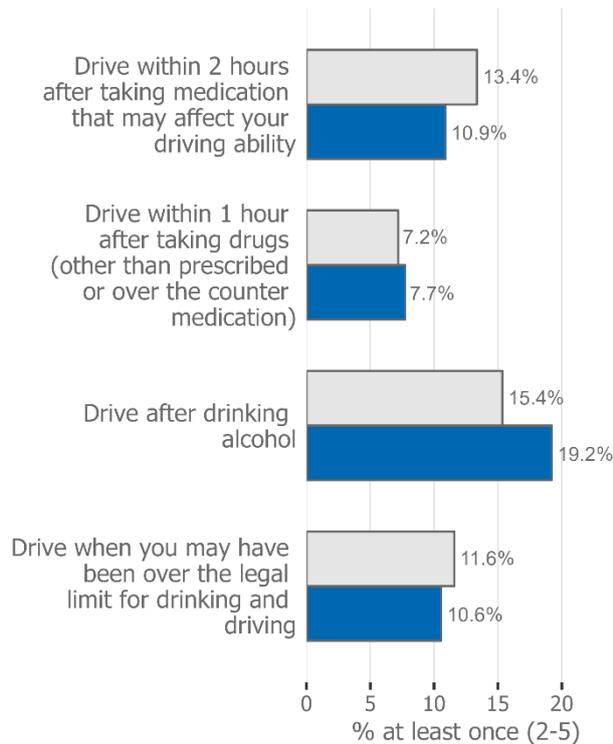

The following figures show a core set of variables in which Denmark (blue bar) is compared with the Europe22 ESRA3 mean<sup>2</sup> (grey bar).

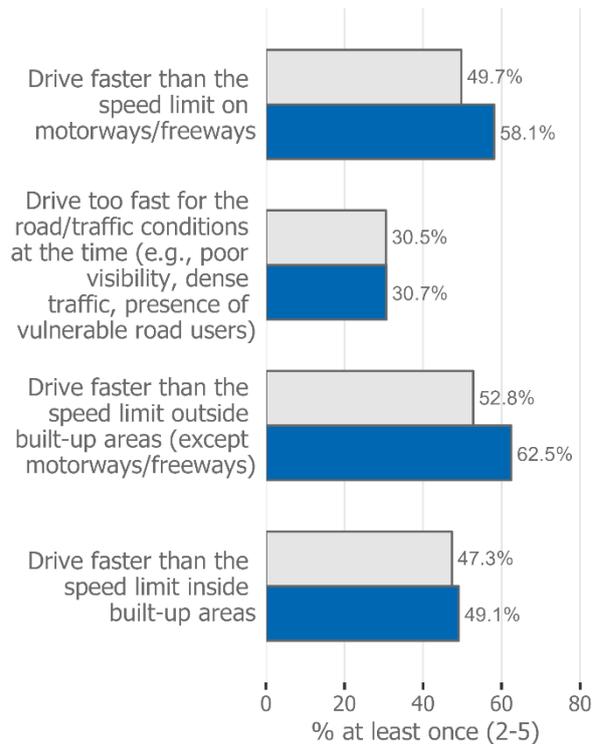

## Self-declared behaviour

Over the last 30 days, how often did you ...? (5-point scale from 1=never to 5=(almost) always)

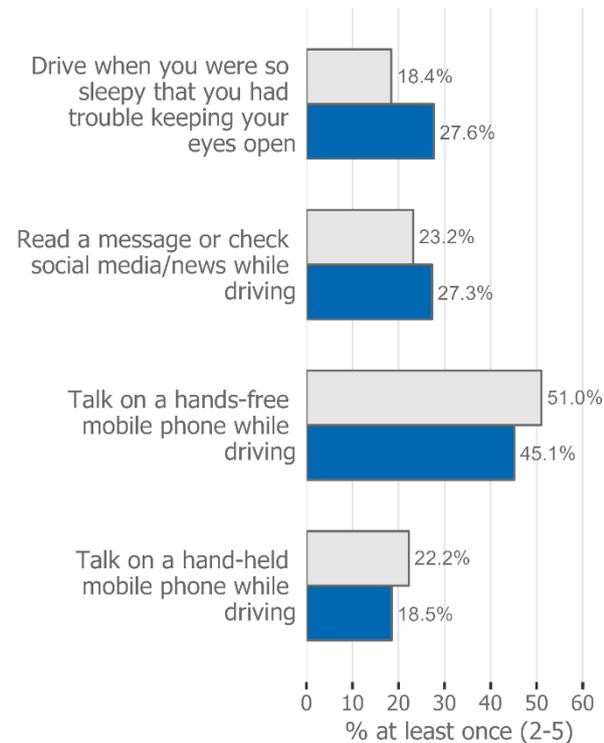

### DUI as a car driver

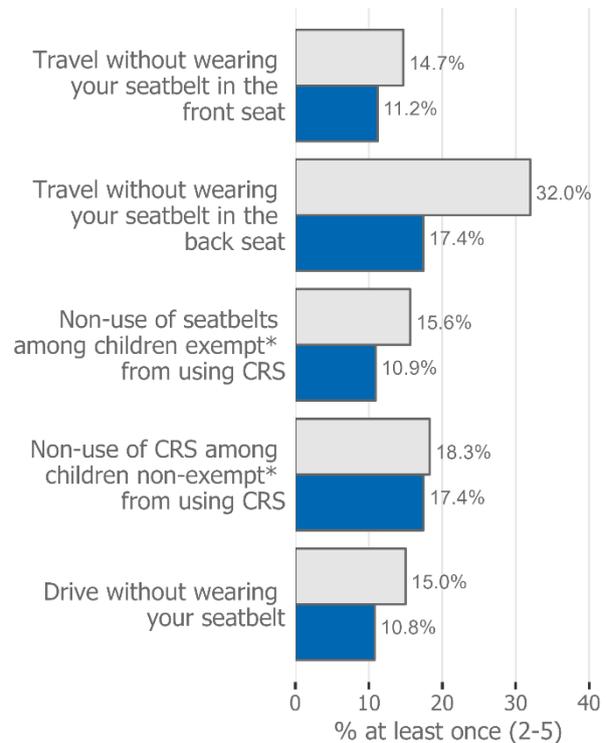

### Speeding as a car driver

### Distraction & fatigue as a car driver

### Seat belt use in a passenger car

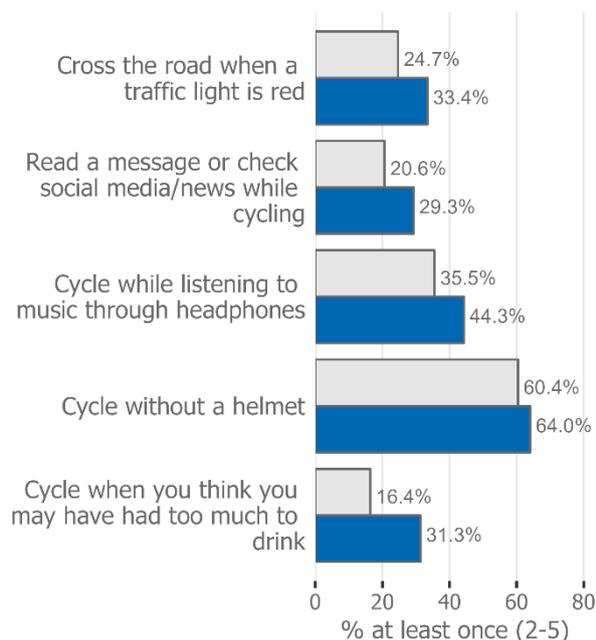

\* specified based on national regulation; CRS = Child Restraint System

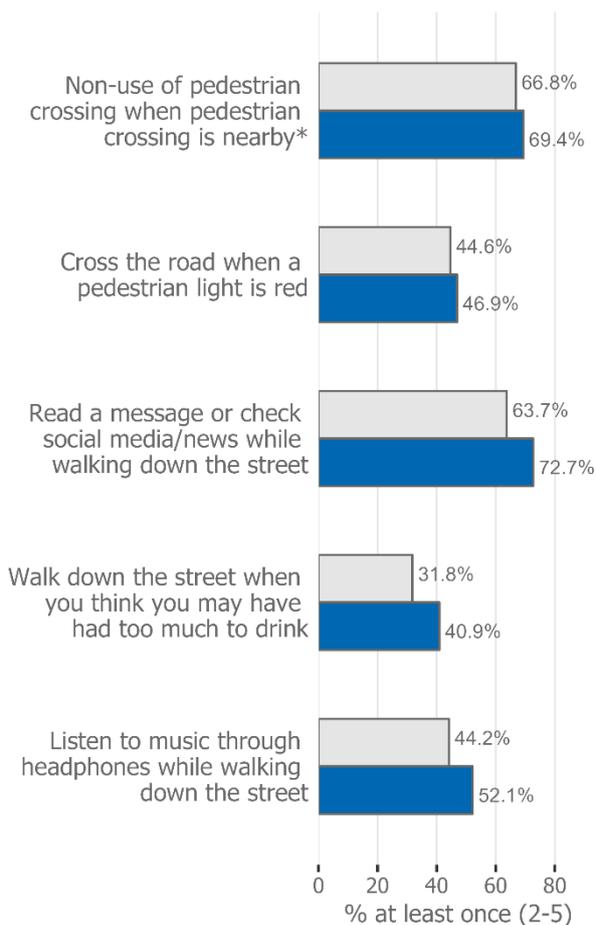

## Self-declared behaviour

Over the last 30 days, how often did you ...? (5-point scale from 1=never to 5=(almost) always)

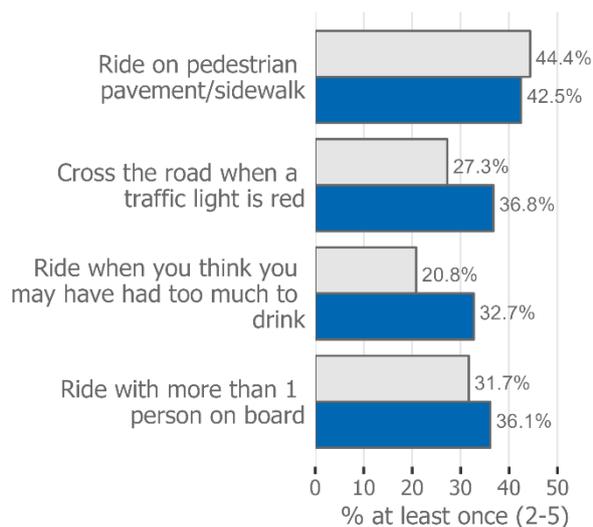

### Cyclists

### Pedestrians

### E-scooter riders

\* specified based on national regulation

### Sample size\*\*

Road users who use each transport mode at least a few days per month.

Mode of transportation	Denmark	Europe22
Car drivers	647	16,900
Car drivers who transported children (<18y) exempt* from using CRS	261	6,110
Car drivers who transported children (<18y) non-exempt* from using CRS	224	6,441
Car passengers	654	15,480
Cyclists	520	10,650
E-scooter riders	104	2,918
Pedestrians	729	19,119

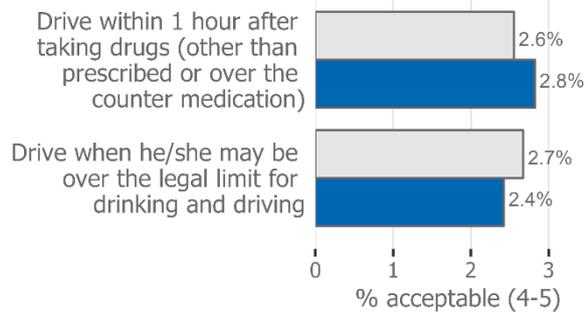

\*\*weighted sample for self-declared behaviours. CRS = Child Restraint System

## Personal acceptability

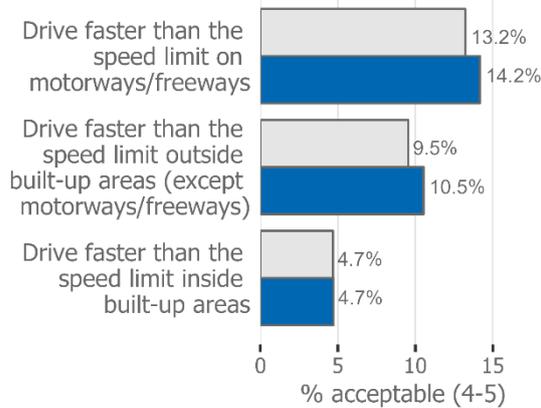

How acceptable do you, personally, feel it is to ...? (5-point scale from 1=unacceptable to 5=acceptable)

### Car drivers

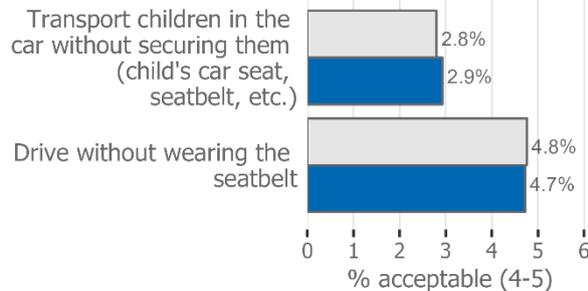

#### DUI

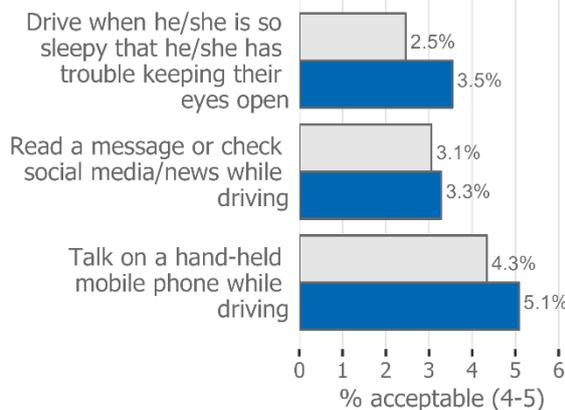

#### Speeding

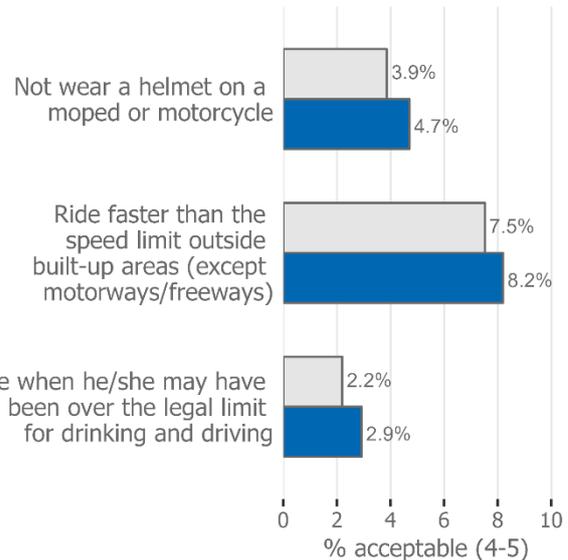

#### Seat belt

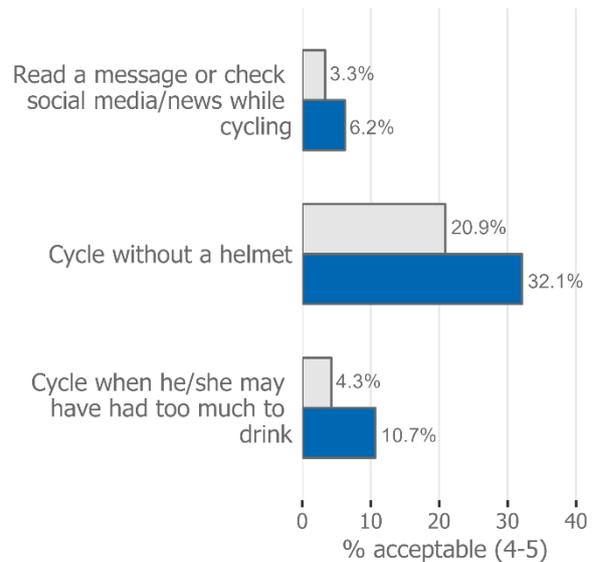

#### Distraction & fatigue

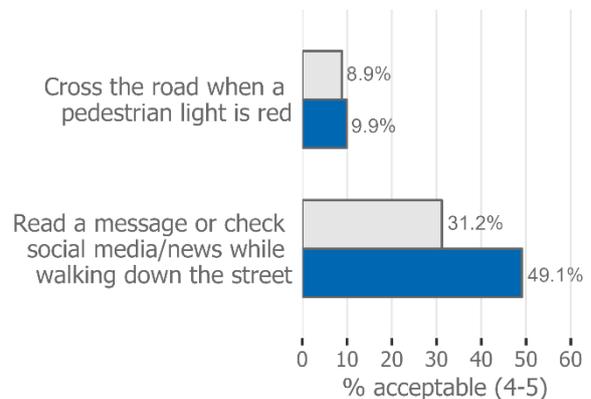

### Motorcyclists & moped riders

### Cyclists

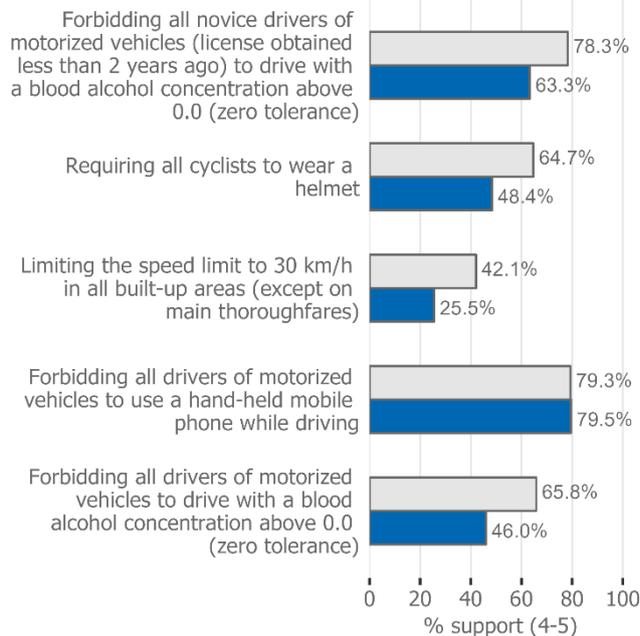

### Pedestrians

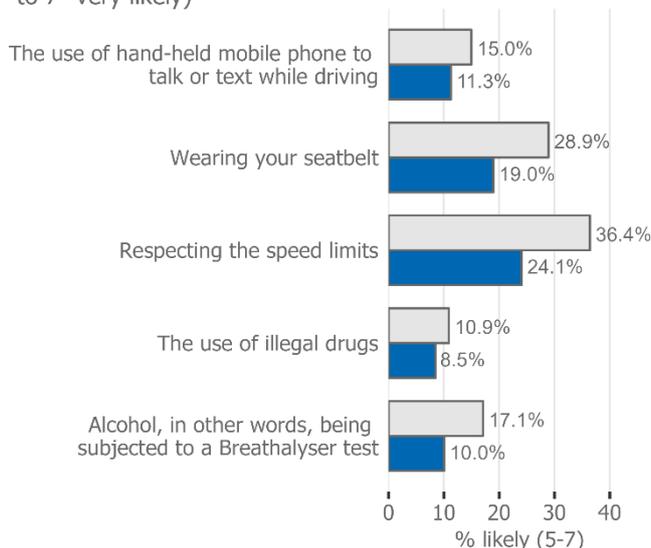

## Support of policy measure

Do you oppose or support a legal obligation ...? (5-point scale from 1=oppose to 5=support)

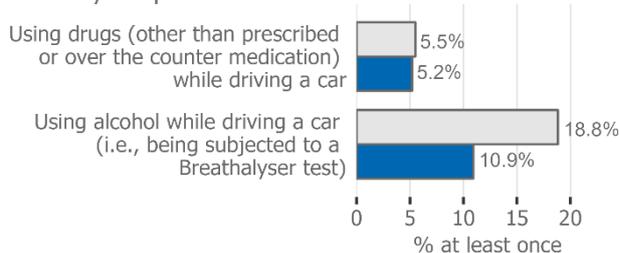

## Enforcement

On a typical journey, how likely is it that you (as a car driver) will be checked by the police (including camera's or radars) for ...? (7-point scale from 1=very unlikely to 7=very likely)

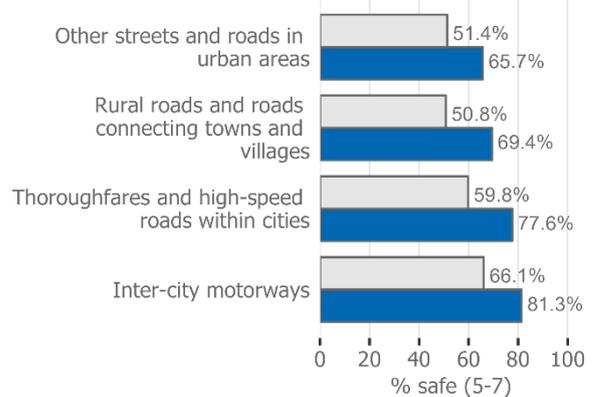

In the past 12 months, how many times have you been checked by the police for ...?

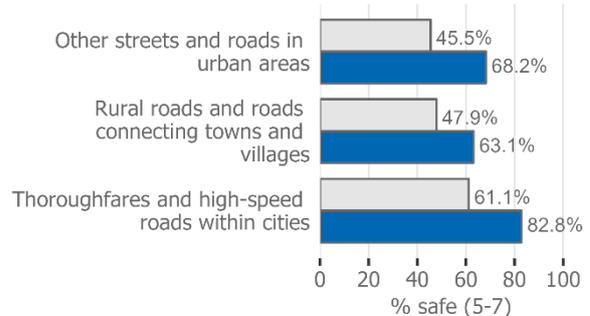

## Infrastructure

How would you rate the roads that you regularly use in terms of safety ...? (7-point scale from 1=very unsafe to 7=very safe)

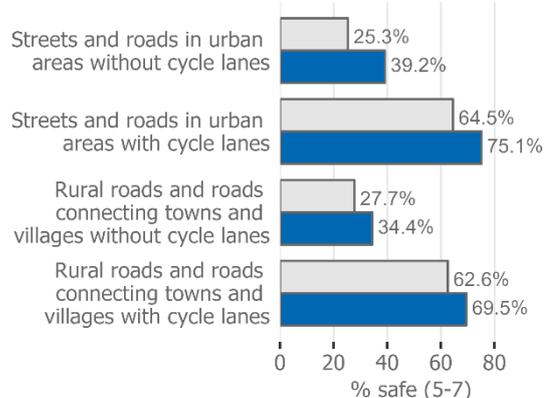

### Car drivers

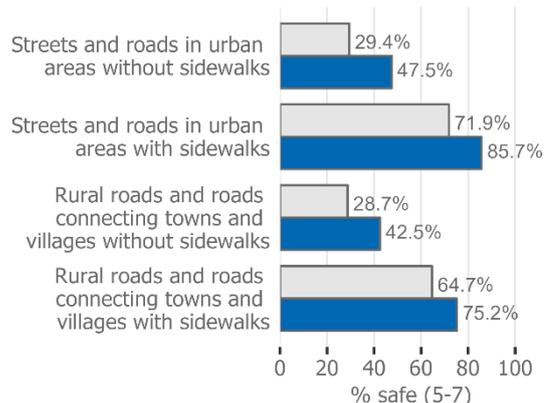

### Motorcyclists & moped riders

### Cyclists

### Pedestrians
